## Year 3 – Chasing Shadows- LIGHT **ENERGY SCIENCE SPRING 1**

Prior Learning: Children know that you can see through translucent materials and not through opague.

## Concept: Energy 4. TWAL to understand how shadows are formed During this unit we will learn how light travels, how We will learn how shadows form and investigate this with different objects. Which cause the darkest shadow? shadows are made and how shadows can change. Which would make the best shadow puppets? Working scientifically: Ask scientific Observe closely Shadows are formed when opaque objects block the light ruestions 1.TWAL to understand the difference between light and darkness 5. TWAL to investigate shadow sizes In this lesson we will explore what light and darkness is, We will be shadow hunters around the school. Can what different light sources there are and observe you find big shadows? Can you find small shadows? areas around the school for levels of light and darkness Ask your own questions about shadow sizes and and what the light sources are. discuss ways to investigate to answer your questions. Ask scientific Observe closely questions Darkness is the absence of light. 2. TWAL to notice that light reflects off some surfaces 6. TWAL to find patterns in how shadows change size Investigate how to change the size of a shadow. Consider distance from light We will learn what reflection is and how it can be used in real life situation (cat's eyes on roads, Ancient Egyptians). source and position of the light source. Can you explain how to make a Then we will investigate what the best material will be to shadow bigger or smaller? reflect light for someone to wear at night! Light travels in straight lines unless it is reflected. Words we will know! 3. TWAL to understand that light can be dangerous We will learn that sun can be damaging to our eyes and find out reflectio natural light source shadow ways to protect ourselves from damage. We will then ask nan-made questions about sunglasses and investigate how they protect us. Ask scientific
