

## Year 6 – Relationships and Sex Education LIVING THINGS SCIENCE SUMMER 2

Prior Learning: Children know body parts that are different for men and women and that a sperm and an egg come together to make a baby.

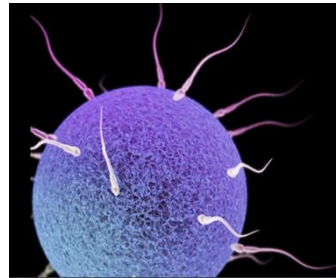

### Concept:

In this unit we will work closely with our PSHE unit to understand the science of conception.

### Working scientifically:

Observe closely

### 4. TWAL how conception occurs

We will learn about the science of conception, naming the body parts involved and what happens to each part during conception and pregnancy.

### 1. TWAL we will learn about puberty in boys

We will recap what we have learnt so far about puberty in boys and think about why these changes happen.

Boys have physical changes different to girls.

### 2. TWAL we will learn about puberty in girls

Today we will learn about the menstruation cycle and other changes girls experience during puberty.

Girls start the menstruation cycle in puberty.

### 3. TWAL we learn why changes in puberty take place

We will compare changes in girls and boys in puberty and learn that these occur to get the body ready to reproduce.

Changes in puberty get the body ready to reproduce.

### Words we will know!

puberty

conception

reproduction

pregnancy

menstruation
